The La Chapelle-aux-Saints Burial Site

In the latest study, a team of archaeologists believe they have provided evidence that Neanderthals engaged in burial practices in Western Europe. The study also suggested that, in demonstrating special patterns of behavior when handling the deceased, Neanderthals possessed much higher cognitive capacity than initially conjectured.

La Chapelle-aux-Saints

Le Néandertalien de La Chapelle-aux-Saints a bien été inhumé.

De nouvelles méthodes d'analyse permettent d'étudier plus scientifiquement la découverte exceptionnelle de la sépulture d’un Néandertalien mise à jour en 1908, en France.
